DETAILED ACTION

Response to Amendments

1. Acknowledgement is made of applicant's amendments filed on February 23, 2006 in response to the *Ex parte Quayle* of the previous office action. The Examiner has accepted the amendments presented by the applicant.
2. The applicant has amended claims 33 and 35, and cancelled claims 34 and 44. Claims 26-33 and 35-43 are currently pending in the application.

Interview

3. In response to an inquiry by the examiner regarding Claim 26 of the instant application, Attorney Kenneth J. LuKacher (Reg. No. 38,539) responded with a clarification on April 17, 2006, the summary of which is given below:

Figure 1 shows that the illumination polarization is in the plane of the figure and the detected light is polarized perpendicular to the plane of the figure. Beamsplitter 16 is described as being non-polarizing or partially polarizing. If the beamsplitter is non-polarizing, the polarizer will not change the polarization of the light returned light. Therefore the light that is detected represents the light with a polarization that is crossed with respect to the incident light.

This is described in the paragraph bridging pages 3 and 4 of the specification.

Allowable Subject Matter

4. Claims 26-33 and 35-43 are allowable.
5. Claim 26 is allowable because prior art documents does not disclose a system for scanning tissue in which the illumination beam and returned illumination are cross polarized inside the tissue, in combination with the rest of the limitations of claim 26.

Art Unit: 2877

6. Claims 30-33 and 35-36 are allowable because they are dependent on independent claim 26 and they include all the allowable limitations of the parent claim.

7. Claim 27 is allowable because prior art documents does not disclose a system for scanning tissue in which the illumination beam and returned illumination from tissue are cross polarized, wherein said tissue is located in a solution which enhances brightness of one or more tissue structures, in combination with the rest of the limitations of claim 27.

8. Claims 28-29 are allowable because they are dependent on independent claim 27 and they include all the allowable limitations of the parent claim.

9. Claims 37 and 41 are allowable because the prior art of record, taken alone or in combination, fails to disclose or render obvious a system or method for scanning tissue or detect cancerous tissue cells comprising polarizing both the illumination light and the light returned from the tissue and controlling or adjusting the polarization of the illumination or returned beam, in combination with the rest of the limitations of the respective claims.

10. Claims 38-40 and 42-43 are allowable because they are dependent on independent claims 37 and 41 respectively, or an intermediate claim.

11. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
